ROBERT STOELHORST

Junior Software Engineer & Passionate Technologist

CAREER PROFILE

For me 2020 has been a year all about carving out a new path to success. I aim to broaden my networks and to begin working with talented people who share a similar drive to be the best developers they can be. I am a passionate optimist and creator and I see the opportunity in every difficulty.
I enthusiastically look for solutions to problems and love to use technology and data to develop systems to make user experiences that function to a high standard. I rally for collaboration and creative thinking and succeed as a motivator, a leader and a contributor to achieve the best result. I have become very humbled at seeking help when progress to complete a task effectively is at stake.

TECH STACK

- *Javascript - jQuery, Underscore, Ajax*
- *React w/hooks, Vue*
- *HTML5 / CSS3*
- *Ruby on Rails*
- *SQL ,Postgresql*
- *Three.js*
- *Node.js*
- *Dom manipulation*

PORTFOLIO PROJECTS

EasySave
Is a budget planner app that I built during my final project week at General Assembly. This was an extremely satisfying Project. I built this with React and it was my favoured project as I had been thinking of building this since week one. My pixel for pixel approach as a replica clone both in terms of functionality and design turned out better than I had hoped. Please follow the link to my Github below for all the details.

TikTok UI clone
Since graduating from General Assembly I have spent a lot of time reviewing the core concepts we were taught during the course and have strengthened those skills working on this project. It is built with React and also implemented Firebase for database and hosting and Material-UI which were both new to me. There have been some really good take aways from this project, in particular, I have learnt a lot about navigating the React framework and CLI's. It's great to have a new project for my portfolio that i'm quite proud of. I am now working on redoing this project with React Native and developing it for ios/android.

-Hosted@ https://tik-tok-in-react.web.app/

Photo-spread
Was built as a group project. It allows users to sign up and upload images to create galleries and have them displayed in a visually appealing way. We implemented Three.js for this project and this was the first time for all the contributors to work with a Tech Stack that was not taught at General Assembly. It was a great challenge for all of us to learn something new and make use of the the tools taught to us at GA. To login in and explore this app please use (ghilly@ga.co) password (chicken)

EMPLOYMENT HISTORY

Atsite Transport & Logistics

PROJECT MANAGER - SITE COORDINATOR | 2008 - 2020

A 12 year journey beginning in the warehouse as an offsider and labourer progressing into a truck driver role both local and interstate. I naturally found my way into managing our offsite teams on our large-scale projects, predominantly serving our customers in commercial office fit-outs. My biggest projects to date were at the Barangaroo development over a 3 year period.

Seal Level Restaurant

CHEF DE PARTIE | 2002 - 2008

My highest achievement during 6 years as a Chef was securing a role at the fine dining restaurant Sea Level, in Sydney. During my employment there I was met with many challenges working at a very popular venue that demanded high quality cuisine.
During my career in hospitality I gained an abundance of knowledge and skills. I developed a strong commitment to high quality customer service and notably a sound work ethic in such a demanding industry.

ACADEMIC HISTORY

General Assembly

SOFTWARE ENGINEERING IMMERSIVE

- *Completed - 2020*

Christchurch Polytechnic Institute of Technology

ADVANCED COOKERY LEVEL 5 AND HOSPITALITY LEVEL 2

- *Completed - 2002*
